## ***Post-Internship Activities***

Our interns have been very successful in obtaining competitive postdoctoral fellowships and employment upon completion of internship. Over the last 5 years, immediately following internship 37 of our 39 interns obtained postdoctoral fellowships (28 clinical, 7 research, 2 clinical/research) and two returned to their doctoral programs to complete their dissertations. Many continue to be actively engaged in scholarly activity, and all interns who are engaged in clinical service delivery have obtained licensure or plan to seek it. Based on our outcome data, we feel confident that our Training Program prepares interns for professional careers consistent with our program's aim, training model and philosophy. Interns who train at WLA go on to careers in VA, academic medical center, or other public sector settings, academia, as well as the private sector.
